

MESSAGE FROM THE BROTHERS OF THE STARS GIVEN TO HUMANITY DURING THE COLLAPSE OF THE CURRENT CIVILIZATION.

8. "Thou shalt not kill", not only people.

Those who kill break the commandment "***Thou shalt not kill***", not only people, but also animals. **They darken their souls.** They also take responsibility for the deaths and sufferings of animals who consume the carcasses of land, sea or freshwater animals, their brothers in Life, the Love of the Father made forms, as visible manifestations of His Love. If they were not consumed, they would not be killed or fished.

In textbooks studied by children and young people, and others published by doctors who are experts in nutrition, for generations the population has been inculcated and educated in the need to consume meat and fish as sources of protein.

Millions of slaughterhouses were built in the towns and cities of the countries of the world, millions of fish auctions, thousands and thousands of fishing boats, fish farms, billions of butchers, fishmongers and seafood restaurants.

Millions of large farms were built to raise cows, calves, pigs and poultry for human consumption, millions of factories to process on an industrial scale billions of tons of meat from various farm animals, fish and poultry to supply millions of supermarkets and department stores with sections for meat, various meat products, fish, seafood and canned food. Billions of hectares of land all over the world were used for the intensive rearing of cows, calves, sheep, goats and other mammals, even horses.

From here tens of thousands of trucks and trailers of animals left and leave day after day for slaughterhouses all over the Earth, dens of pain and endless agonies where these brothers and sisters in Life suffer cruel deaths, their limbs and organs cut off while they are still dying....

This planet has been the permanent holocaust of animals, a vast battlefield of wars cowardly waged against the weak, those billions and billions of helpless brothers in Life, abandoned to their fate in the jungles of pain of this world where it is always night and death lurks. Brothers in Life who feel and suffer, in whom the Father and Christ Are Life, as in man. Brothers in Life killed to feed their corpses to billions of inhabitants of planet Earth, the homeland of un-Love.

All is energy. The day will come when millions upon millions of Earth's inhabitants will know that the vibrations of the suffering, agony and death of the animals who are killed by the Father and the Christ are energy, consumed were becoming attached to their organs. And in many, infinite inhabitants of the Earth, they have been the cause of serious illnesses, which have caused their death. No energy is lost.

For those who have been brought up to eat meat and fish as sources of protein for their bodies, we express:

"Calves, cows, sheep, goats and horses, raised on meadows and hills as sources of protein are fed only on green grasses, or more or less dry grasses to produce the protein for which they will be taken to the slaughterhouses."

They carry these brothers in Life, out of the creative Hands of the Father, as good merchandise to where untold sufferings await them during their agonies and deaths. All happens out of the sight and hearts of those who devour in the cities and towns their corpses, more or less fresh or frozen".

Man would be in better health, better nourished, if he consumed foods rich in vegetable protein, vitamins, fibre and mineral salts. Many people do not know what to eat apart from meat, sausages and other meat products, fish and canned food, bread, potatoes, and few vegetables and fruit.

If members of a family were to walk through the food sections of supermarkets, and on a notepad take notes of how many foods there are, minus meats, meat products, fish, their preserves and seafood, they would see that there are numerous good foods on their shelves and in their vegetable, fruit, greens, nuts, pasta, pulses and cereals sections and numerous foods derived from what is grown and harvested by farmers and market gardeners, as examples.

You will find in your neighbourhood supermarkets and shops plenty of good food, consumed by people of all ages, whether they call themselves vegetarians or not, well fed and nourished, in good health.

If the sons and daughters of God in the countries of the earth feel that they should stop eating meat, fish, fish products, shellfish, seafood, birds and poultry out of love for their fellow animals, they should not stop eating from one day to the next the meat, sausages, fish, seafood and fish products that have been a regular part of their meals.

They would be making a mistake, even if out of love for their animal brothers and sisters, they have become aware of the fact that they should stop eating foods for which they have to suffer and die. Their bodies could be destabilised by this abrupt cutting off of foods of animal origin. Fanaticism and repression do not belong to the sphere of Light, they are induced by Darkness.

As an aid and explanation we express the following:

What would happen to the engine of any automobile, anchored to the chassis of a hydraulic press, if in an instant the ram of this press suddenly discharged its powerful

pressure on a rod incorporated in the power take-off of the engine to stop its rotation, accelerating the engine to 3,000 revolutions per minute?

It is obvious, many will think, that pistons, connecting rods, camshafts, valves, cylinder head gaskets and other components would be severely damaged, rendering the engine unusable.

Based on this example, cell groups and organs of the body, which have been carrying out their functions magnetised by the energy provided by meat products, which vibrate at certain frequencies, if they were suddenly deprived of the energy and vibration frequency they usually receive to carry out their organic functions, they would be destabilised, altering their functions.

What to do then? If anyone wishes, they could begin this new experience by consciously speaking to the Christ, the Life, within themselves.

He knows of the new experience he wants to begin out of Love for the animals. He would simply speak to Christ about his desire to stop eating the flesh of the animal brethren. The Christ of God, the All in all united with the Father, therefore, the Force in all, is in all that the human body needs. Christ is Life.

"If you wish to stop eating the meat of your animal brethren, with the words you are accustomed to use, you can tell Christ to help you to stop eating the meat and animal products you have been consuming. That you want to start by decreasing the amount of what you have been consuming, bringing instead the new plant-based foods that you want to feed and nourish your body with. If you wish, you can tell Christ that His Light may assist your organs in the process of changing the vibration of the meat foods you have been eating, and you want to stop eating them.

In this way, by the Hand of Christ, the change from feeding on meat products to feeding on plant products will take place, without holding back, out of Love for your body."
